

WHO WE ARE

Stevens Women in Computer Science (SWiCS) Club aims to unite undergraduate students of all genders, majors, ethnicities, and other identities in order to promote women in the computer science related fields both in academia and in industry.

Situated in Stevens Institute of Technology - a premier, private research university in Hoboken, NJ, SWiCS flourishes in an environment where 30% of the student population is female and out of all computer science majors, less than 45% are female.

Against all odds, SWiCS is the driving force that establishes computer science as a highly desirable career for women through an exciting array of workshops, networking opportunities, and conferences.

Our members attending the women's networking night

WHAT WE DO

1. WORKSHOPS

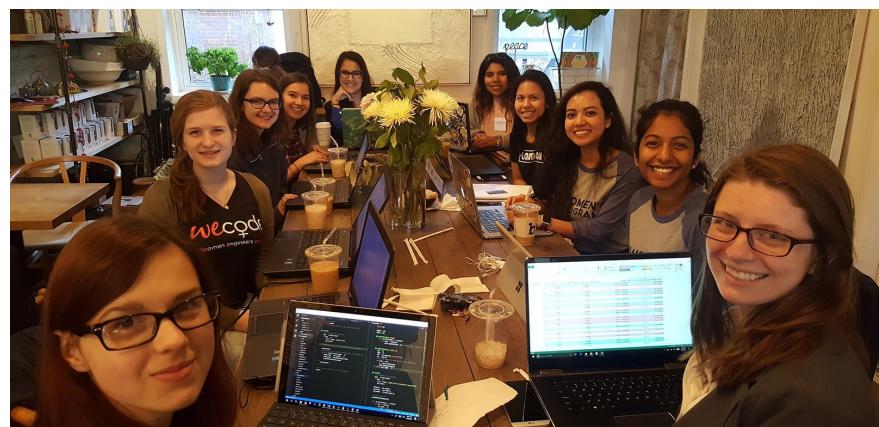

At general body meetings, we routinely host a variety of workshops that show topics not seen in the classroom. We offer workshops ranging from virtual reality development, app development, website creation all the way to brain teasers and de-stressing for finals.

2. CONFERENCES

We offer our members the opportunity to branch outside of campus with our trips to conferences. We provide financial aid to students who want to take advantage of the professional development opportunities, network with employers, and connect with like-minded WiCS members from around the globe.

3. COFFEE&&CODE

Our club is dedicated to networking and collaborating with others. We provide Coffee&&Code sessions to our members where we hang out at local coffee shops in Hoboken and drink coffee/eat food while we work on our coding assignments and homework.

One of our Coffee&&Code session at Bwe Kafe in Hoboken, New Jersey

GENERAL SPONSORSHIP

Funding contributed toward general sponsorship will be used to support our activities, including subsidizing conference fees and our various coffee&&code sessions. In addition to general sponsorship, companies also have the opportunity to sponsor individual SWiCS events or sponsor our members to attend the Grace Hopper Celebration and/or Harvard WECode Conference.

Please note if you would like to participate at a level not shown below OR if you have any questions about the benefits of each package, please reach out to us at stevenswics@gmail.com

CONFERENCE SPONSORSHIP

The Grace Hopper Celebration is a series of conferences designed to bring the research and career interests of women in computing to the forefront. It is the world's largest gathering of women in computing. This conference will allow our members to engage in professional development and leadership workshops, network with professionals and other students in WiCS (Women in Computer Science) sections. Your company's contributions will go towards transportation (\$600-700/round trip), hotels (\$225/night) and registration (\$450).

The WECode Conference (Women Engineers Code) is the largest, student run Women in Computer Science conference held at Harvard University each winter. The conference is dedicated to expanding the skills, network, and community of technical women worldwide, bringing together engineers over the course of two days to share ideas and conversations on technology and innovations. Your company's contributions will go towards transportation (\$50-60/round trip), hotels (\$255/night) and registration (\$40).

Please note if you would like to participate at a level not shown below OR if you have any questions about the benefits of each package, please reach out to us at stevenswics@gmail.com
